DETAILED ACTION

Allowable Subject Matter

1. Claims 1-22 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-11 and 21, the prior art alone or in combination does not teach the limitation of an apparatus comprising a quasi 1D dielectric material having a charge or spin density wave state, an electrodes located adjacent portions of the dielectric material.

With respect to claims 12-20 and 22, the prior art alone or in combination does not teach the limitation of an apparatus comprising a quasi 1D dielectric material disposed between an electrodes, wherein the dielectric material having a charge or spin density wave state.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

2. The applicant has argued that Davis is silent with respect to an apparatus comprising a quasi 1D dielectric material having a charge or spin density wave state. The examiner finds this argument persuasive. Therefore, the examiner made decision to allow this limitation over the prior art of record.
